Index

≡ (identically equal), 141, 157
$(1 + x)^n$, expansion of, 173

$a \sin x + b \cos x$, 56, 104
acceleration, 88
  as a function of displacement, 110
  as a function of time, 88
  as $\dfrac{dv}{dt}$ and $\dfrac{d^2x}{dt^2}$, 88
  as $\dfrac{d}{dx}(\frac{1}{2}v^2)$, 110
  due to gravity, 94
  units of, 89
alternate angles, 286
alternate segment theorem, 377
altitudes of a triangle, 303, 363, 364, 377
amplitude, 99
'and' in probability, 399
angles, 284
  and transversals, 286
  at the centre, 345, 353
  at the circumference, 353, 358, 365
  between a line and a plane, 68
  between two planes, 69
  bisectors of, 309, 317, 343
  in a cyclic quadrilateral, 359
  in a semicircle, 352
  in opposite segments, 359
  in the same segment, 358
  size of, 284
Apollonius' theorem, 328
arcs of a circle, 346
area formulae, 321
arithmetic mean, 85, 384, 386
arithmetic series, 241
  and linear functions, 248
  and simple interest, 248
  in geometry, 338
auxiliary angle, 56

binary numbers, 425
binomial expansion, 173, 179
  greatest coefficient and term of, 197
  identities on, 201, 429, 431
  probability and greatest term of, 448
binomial theorem, 173, 189
  and compound interest, 252
  and counting, 422, 426, 429, 431, 442
  and differentiation, 202
  and divisibility, 196
  and integration, 202, 207
  and power series, 197
  and probability, 442
  and the product rule, 239
  and trigonometric identities, 200
  proof of, 192, 200
birthday problem, 438
boundary conditions, 93, 267, 270
Buffon's needle problem, 397
bulldozers and bees, 247

Central Railway Station, 324
centroid of a triangle, 337, 364
chords, 344
  and tangents, 80, 262, 272
  and average rates, 262, 272
  and average velocity, 81
  distance from the centre, 347
  intersecting, 383
  perpendicular bisectors of, 347
circles, 344
  area of, 225, 321
  touching externally, 371
  touching internally, 371
circular motion, 358
circumcentre of a triangle, 309, 348, 350, 364, 309, 363, 364
co-interior angles, 286
collinear points, 284
combinations (unordered selections), 427
complement of a set and probability, 400
complementary events, 398
compound interest, 248
  and e^x, 252
  and geometric series, 249
  and natural growth, 257, 274, 276
  and the binomial expansion, 252

concentric circles, 344
concurrent lines, 284
concyclic points, 365
  tests for, 365
congruence, 300
  spurious ASS test, 368
  standard tests for, 301, 330
constructions with ruler and compasses, 282
  angle of 60°, 306
  bisector of a given angle, 309, 317
  centre of a given circle, 348
  circle through three given points, 348
  circle with a given centre and tangent, 375
  circle with a given tangent through two given points, 388
  circles tangential to two given lines, 377
  circumcircle of a given triangle, 348, 350
  copying a given angle, 306
  direct common tangents, 377
  geometric mean, 386
  indirect common tangents, 377
  line parallel to a given line, 319
  parallelogram, 310, 311
  perpendicular bisector, 319
  perpendicular line, 319
  point inside a square, 369
  rectangle, 317
  rhombus, 316
  right angle, 319
  right angle at a given endpoint, 355
  square, 317
  squaring a given polygon, 388
  squaring a given rectangle, 388
  squaring a given triangle, 388
  tangents from a given external point, 373
convex polygons, 294
corresponding angles, 286
$\cos^{-1} x$, 10
  derivative of, 19
$\operatorname{cosec}^{-1} x$, 11, 24
$\cot^{-1} x$, 11, 24
counting, 414
  and binomial theorem, 422, 426, 429, 431, 442
  and probability, 432
  around a circle, 438
  multiplication principle of, 414
  ordered selections, 414
  unordered selections, 425
  using cases, 423
  with and without repetition, 414
  with identical elements, 421
cubics
  discriminant of, 168
  symmetry of, 146, 172
curve sketching
  with calculus, 21
  without calculus, 14

decreasing at a point, 3
decreasing functions, 2
depreciation, 250
  and natural decay, 276
derangements, 420
  and e, 432
diameters of a circle, 344
disjoint sets and probability, 398
displacement, 80
  as a definite integral, 95
  as a primitive, 93
distance travelled, 81
division of integers and polynomials, 147

ellipse, area of, 225
equally likely possible outcomes, 380
equilateral triangles, 303
Euclid, 282
Euler line, 364
Euler's constant, 343
event space, 391
Excel™, 257
exponential functions, 4
  and geometric series, 249, 271
  and finance, 249, 252
exterior angles, 292, 294

factor theorem, 152
  consequences of, 155
factorials, 185
  and differentiation, 188
  and proof of binomial theorem, 200

Galileo, 94
geometric mean, 85
  in geometry, 333, 374, 376, 383, 386
geometric series, 242
  and compound interest, 249
  and exponential functions, 249, 271
  and investing money, 253
  and loan repayments, 258
  in geometry, 338, 388
gravitation, 94
  Newton's law of, 115
Gregory's series, 31
'growth rate', 271

halving the interval, 226
  convergence of, 246

harmonic conjugates, 172, 387
harmonic mean, 85, 387
harmonic series, 343
homogeneous equations, 52
horizontal line test, 1
housing loan repayments, 258
  recursive method for calculating, 261

incentre of a triangle, 376, 377
inclination, angle of, 124
inclusion–exclusion principle, 402, 432
increasing at a point, 3
increasing functions, 2
independent events, 403
inequalities, 233
  geometric, 309
initial conditions, 93
instalments, 253, 258
intercepts, 338
  on intersecting chords, 383
  on a secant and a tangent, 383
  on secants, 383
interior angles, 292, 294
intersection of sets and probability, 400
intervals, 284
inverse functions, 1
  equations of, 1
  graphs of, 1
  restricting the domain, 1
inverse relations, 1
inverse trigonometric functions, 9
  derivatives of, 19
  graphs of, 14
  integration using, 25, 26
  symmetries of, 15
investing money, 253
  recursive method for calculating, 257
isosceles triangles, 302

King Arthur, 439
kites, 316, 320

limits, 233
  of displacement, 87
  of geometric series, 3
  of velocity, 87
lines, 283
loan repayments, 258
  recursive method for calculating, 261
logarithmic functions, 4

Maclaurin series, 188
major and minor arcs, sectors and segments, 346
Martin Place, 324
Mathematica™, 257
mathematical induction, 188, 299, 421
  in geometry, 364
maximisation and minimisation
  in a binomial expansion, 197, 448
  in geometry, 358, 363, 382
medians of a triangle, 303, 337, 364
motion, 79
  and geometry and arithmetic, 79
  in one dimension, 80
  of projectiles, 123
  simple harmonic, 99, 116
  using functions of displacement, 109
  using functions of time, 80
mutually exclusive events, 398

$n!$ (n factorial), 185
$\binom{n}{r}$, 180, 427
natural growth and decay, 270, 277
  and compound interest, 257, 274, 276
  and geometric series, 149, 271
${}^{n}\mathrm{C}_{r}$, 180, 427
Newton's law of cooling, 278
Newton's method, 226
  and chaos theory, 233
  and loan repayments, 262
  speed of convergence of, 233
Newton's second law of motion, 79, 89
nine-point circle, 369
'not' in probability, 398
${}^{n}\mathrm{P}_{r}$, 415

'or' in probability, 399
organ pipes, 343
orthocentre of a triangle, 363, 364, 377

parallel lines, 284
  distance between, 315
parallelograms, 310
  vectors and diagonals of, 314
Pascal pyramid, 179
Pascal triangle, 173, 181, 429
  addition property of, 174, 183
  and arithmetic sequences, 196, 207
  and compound interest, 178
  and geometry, 179
  and integration, 178
  identities on, 178, 201, 429, 431
  patterns in, 178
  properties of, 174, 182
permutations, 415
physics, 80
  motion formulae from, 95

stages of an experiment, 392
stationary points, 87
Stirling's formula for $n!$, 189, 239
subtended angles, 345
sums to products, 64
superannuation, 253
  recursive method for calculating, 257

t-formulae, 327, 59
$\tan^{-1} x$, 10
  derivative of, 19
  power series for, 31
tangents, 344
  and instantaneous rates, 262, 272
  and instantaneous velocity, 86
  and radii, 370
  and secants, 383
  direct common, 371
  from an external point, 370
  indirect common, 371
Thales, 352
three-dimensional trigonometry, 67
tides, 102
time, 80
transversals, 286, 338
trapezium, 310, 313
  and its diagonals, 323, 337
tree diagrams, 392
  probability tree diagrams, 409
triangles, 292
trigonometric equations, 49
  general solutions of, 32
trigonometric functions, 9, 37, 56, 208, 213
trigonometric identities, 37
trigonometric series, 244, 247

union of sets and probability, 400

vectors, 87
  and diagonals of a parallelogram, 314
  resolution of, 124
velocity
  as a definite integral, 95
  as a derivative, 86
  as a primitive, 93
  as a function of displacement, 109
  average, 81
  instantaneous, 86
  resolution of, 124
Venn diagrams and probability, 391, 398
vertically opposite angles, 286

Wallis' product, 160, 449

$x = a\cos(nt + \alpha)$, graphs of, 103
$(x + y)^n$, expansion of, 179
